

CERTIFICATE OF COMPLIANCE  
MASH 2016 CRASHWORTHINESS

This letter, known as CoC-VP-OTLD, serves as a self-certifying certificate of crashworthiness of delineators known as Vertical Panels and Opposing Traffic Lane Dividers produced by Impact Recovery systems. These delineators are up to 12" x 36" plastic panels that utilize a spring system which gives way when impacted. It is generally affixed to a crumb rubber base that weight approximately 36 pounds.

These devices are small and light weight with no attachments, and as such we consider them to be "Category 1" workzone devices. These devices have been in common use for many years and are known to be crashworthy by testing of similar devices and years of demonstrable safe performance. These devices were some of the original devices tested to NCHRP-350 and have demonstrated crashworthiness over two decades of use without safety incident. The testing is documented in report WZ-2a by the FHWA.

This document should not be reproduced except in full.

A handwritten signature in black ink, appearing to read "Kenneth A. Parrott".
