

CERTIFICATE OF COMPLIANCE
MASH 2016 CRASHWORTHINESS

This letter, known as CoC-MP2, serves as a self-certifying certificate of crashworthiness for the MP2 post product by Impact Recovery systems. The MP2 post is a 2.375" diameter plastic delineator made in heights up to 60" tall and used in channelizing traffic safety applications. It is affixed to the roadway with a 8" x 8" HDPE base that is approximately 1" tall. The entire system weighs less than 7 pounds.

The MP2 post is a "Category 1" small and light weight device with no attachments. Products such as these have been in common use for many years and are known to be crash worthy by testing of similar devices and years of demonstrable safe performance. Further, MP2 was MASH tested along with and as attached to our Tuff Curb and Tuff Curb XLP products. These test results are documented in WZ-304, WZ-317, and WZ-318.

This document should not be reproduced except in full.

A handwritten signature in black ink that reads "Kenneth A. Parrott".
