

**Engineered to Protect What Matters**

**Government & Highway  
Safety Solutions**

## Smart Cities Start with Safer Streets

From busy intersections to high-speed highways, government agencies and municipalities face constant pressure to improve safety for drivers, pedestrians, cyclists, and workers. Impact Recovery™ offers durable, impact-resistant traffic safety solutions designed to reduce risk, lower maintenance costs, and enhance traffic flow across your infrastructure.

### Product Benefits:

- **Built to Last:** Our flexible, rebounding products return to an upright position after impact, reducing the need for constant replacements.
- **Cost-Effective Solutions:** Fewer replacements mean long-term savings for departments managing tight budgets.
- **Easy to Install & Maintain:** Quick deployment and low-maintenance designs save time and reduce work zone hazards.
- **Proven in the Field:** Trusted by DOTs, city planners, and public works teams across the country.

### Applications:

- City Streets & Intersections
- School Zones & Pedestrian Crossings
- Bike & Bus Lanes
- Work Zones & Road Construction Sites
- Highways & Interstate Ramps
- Government Facilities & Military Bases

# Delineator Posts

PRODUCTS: MP2, TUFF POST, OMEGAPOST

---

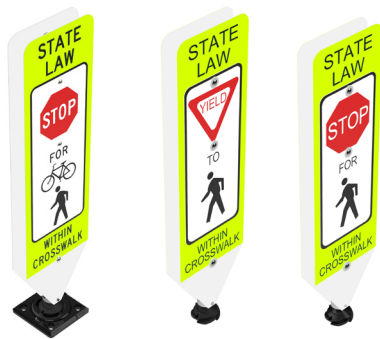

The Omega, MP2, and Tuff Post options provide customizable and durable delineation and channelization for nearly any need, in order to enhance a safe and uninterrupted traffic flow.

# Pedestrian Safety

PRODUCTS: IN-STREET PEDESTRIAN CROSSWALK SIGN

---

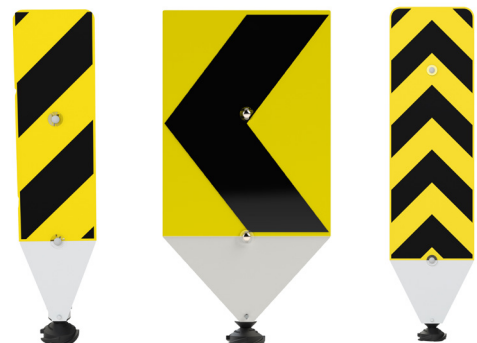

Our industry leading highly-reflective, in-street pedestrian crosswalk signs are helpful to alert motorists to pedestrian crossing zones. They provide enhanced conspicuity at non-signalized intersections and mid-block crossings to alerting motorists of local laws concerning yielding to, or stopping for, pedestrians.

# Permanent Markers

PRODUCTS: HAZARD MARKERS, SERGEANT STRIPE PANELS, CHEVRON PANELS

---

Permanent Markers are ideal for marking obstructions within or adjacent to the roadway. The Hazard Markers, Sergeant Stripes, Chevrons, and Type II Object Marker work well to alert drivers of bridge and culvert approaches, easily missed end treatments, and other hazards that may not be immediately apparent to a fast-approaching motorist.

## Lead the Way in Safer Infrastructure

By choosing Impact Recovery traffic safety products, you're investing in the protection of your community, the efficiency of your operations, and the future of your public spaces. Together, we can build safer roads for everyone.

- **Public Safety First:** Proven, impact-resistant solutions help reduce accidents, protect pedestrians, and safeguard work zones—keeping your citizens and employees out of harm's way.
- **Built for Harsh Conditions:** Designed to withstand extreme weather, UV exposure, and high-traffic environments, our products perform reliably year-round—no matter the climate.
- **Enhanced Traffic Clarity:** Clearly marked, high-visibility products help ensure adherence to traffic laws and safety protocols, making roads safer and easier to navigate for all users.
- **Community Trust:** Visible investments in road safety build public confidence, demonstrating your commitment to proactive governance and long-term community well-being.
